First Year Graduate Student Seminar[1]

Thursday, September 15, 2022

- Goals
- Additional Seminars
- Applying for Fellowships
- Annual Review

[1] These slides will be downloadable from www.math.tamu.edu/~rojas/20220915fygss.pdf later tonight...

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.
- Give first-year students an overview of the department and information to help them choose a research topic and advisor.

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.
- Give first-year students an overview of the department and information to help them choose a research topic and advisor.
- Address common questions

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.
- Give first-year students an overview of the department and information to help them choose a research topic and advisor.
- Address common questions
- Give students information about our profession

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.
- Give first-year students an overview of the department and information to help them choose a research topic and advisor.
- Address common questions
- Give students information about our profession
- Give the graduate director an opportunity to meet you!

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.
- Give first-year students an overview of the department and information to help them choose a research topic and advisor.
- Address common questions
- Give students information about our profession
- Give the graduate director an opportunity to meet you! (And communicate announcements, reminders, etc.)

Goals

- Give first-year students from different areas (mathematical and geographical) a chance to meet and talk.
- Give first-year students an overview of the department and information to help them choose a research topic and advisor.
- Address common questions
- Give students information about our profession
- Give the graduate director an opportunity to meet you! (And communicate announcements, reminders, etc.)
- Provide you an opportunity to ask questions about the program.

FAQ

- How should I prepare for the qualifying exams?

FAQ

- How should I prepare for the qualifying exams?
- Can I get summer funding?

FAQ

- How should I prepare for the qualifying exams?
- Can I get summer funding?
- How can I get a fellowship?

FAQ

- Many, many more!...

Upcoming FYGSS meetings (tentative)...

- Next week-ish: Ali Foran will talk about TA/grading duties

Upcoming FYGSS meetings (tentative)...

- Next week-ish: Ali Foran will talk about TA/grading duties
- Later: Senior grad students will talk about outreach opportunities

Upcoming FYGSS meetings (tentative)...

- Next week-ish: Ali Foran will talk about TA/grading duties
- Later: Senior grad students will talk about outreach opportunities
- Later: Panel discussion: preparing for quals

Upcoming FYGSS meetings (tentative)...

- Next week-ish: Ali Foran will talk about TA/grading duties
- Later: Senior grad students will talk about outreach opportunities
- Later: Panel discussion: preparing for quals
- Later: Panel discussion: adjusting to graduate school

Additional Seminars

- **GSO: Thu, 4:30PM-5:30PM in 506A**
  - "Come for the cookies, stay for the pizza!"
  - Meet your fellow graduate students and learn about the research programs of our faculty!
  - See `https://sites.google.com/tamu.edu/tamugso/home` for more info.
- Industrial and Applied Math Seminar (run by our department's SIAM Student Chapter)

- $$$ and reduced or no TA duties!
- Prestige (looks good on your CV!)
- Practice: Most researchers in the mathematical sciences continue to apply for grant funding throughout their careers, and it's good to get practice ASAP: process as soon as possible: The more application you write, the better you will get at writing them.

Why apply for a fellowship?

- $$$ and reduced or no TA duties!
- Prestige (looks good on your CV!)
- Practice: Most researchers in the mathematical sciences continue to apply for grant funding throughout their careers, and it's good to get practice ASAP: process as soon as possible: The more application you write, the better you will get at writing them.
- Writing a proposal forces you to take a step back and think more broadly about what you genuinely want to working on, and how to build a research program.

What fellowships are available?: See AMS website!

- The American Mathematical Society (AMS) collects information about fellowship opportunities in the mathematical sciences on its website: http://www.ams.org/programs/students/gradinfo

What fellowships are available?: See AMS website!

- The American Mathematical Society (AMS) collects information about fellowship opportunities in the mathematical sciences on its website: http://www.ams.org/programs/students/gradinfo
- Useful site... and the fellowship info is at the bottom of the page.

Example fellowship: NSF!

- Single biggest source of graduate fellowships in the country (2,000/yr)

Example fellowship: NSF!

- Single biggest source of graduate fellowships in the country (2,000/yr)
- In 2021, 19 were awarded to students from TAMU

English Language Requirement

- International students must have English Proficiency Certification to serve as teaching assistants,

English Language Requirement

- International students must have English Proficiency Certification to serve as teaching assistants, and the department expects students to achieve this during their first year.

English Language Requirement

- International students must have English Proficiency Certification to serve as teaching assistants, and the department expects students to achieve this during their first year.
- Certification can be obtained in three ways:

English Language Requirement

- International students must have English Proficiency Certification to serve as teaching assistants, and the department expects students to achieve this during their first year.
- Certification can be obtained in three ways:
  - Completion of an undergraduate degree at an accredited U.S. college or university (MS not sufficient)

English Language Requirement

- International students must have English Proficiency Certification to serve as teaching assistants, and the department expects students to achieve this during their first year.
- Certification can be obtained in three ways:
  - Completion of an undergraduate degree at an accredited U.S. college or university (MS not sufficient)
  - Achieving a sufficiently high score on an appropriate standardized test

English Language Requirement

- International students must have English Proficiency Certification to serve as teaching assistants, and the department expects students to achieve this during their first year.
- Certification can be obtained in three ways:
  - Completion of an undergraduate degree at an accredited U.S. college or university (MS not sufficient)
  - Achieving a sufficiently high score on an appropriate standardized test
  - Scoring at least 80 on the English Language Proficiency EXAM (ELPE) oral exam

Annual Review

- Good Standing: Many department policies specify that a student must be in good standing, so it's worth reviewing what that means. To be in good standing, PhD students should:

Annual Review

- Good Standing: Many department policies specify that a student must be in good standing, so it's worth reviewing what that means. To be in good standing, PhD students should:
  - Maintain a 3.0 or better cumulative GPA each and every semester

Annual Review

- Good Standing: Many department policies specify that a student must be in good standing, so it's worth reviewing what that means. To be in good standing, PhD students should:
  - Maintain a 3.0 or better cumulative GPA each and every semester
  - Adequately perform their TA duties every semester

Annual Review

- Good Standing: Many department policies specify that a student must be in good standing, so it's worth reviewing what that means. To be in good standing, PhD students should:
  - Maintain a 3.0 or better cumulative GPA each and every semester
  - Adequately perform their TA duties every semester
  - Pass all breadth requirement courses with a B or better during their first 4 years

Annual Review

- Good Standing: Many department policies specify that a student must be in good standing, so it's worth reviewing what that means. To be in good standing, PhD students should:
    - Maintain a 3.0 or better cumulative GPA each and every semester
    - Adequately perform their TA duties every semester
    - Pass all breadth requirement courses with a B or better during their first 4 years
    - Pass one qualifying exam during the first 1.5 year

Annual Review

- Good Standing: Many department policies specify that a student must be in good standing, so it's worth reviewing what that means. To be in good standing, PhD students should:
  - Maintain a 3.0 or better cumulative GPA each and every semester
  - Adequately perform their TA duties every semester
  - Pass all breadth requirement courses with a B or better during their first 4 years
  - Pass one qualifying exam during the first 1.5 year
  - Pass two qualifying exams during their first 2 years

  - Receive positive progress reports from their advisor every year after filing a degree plan
  - Time in the program less than 12 long semesters
  - Uphold the ethics code of the university

Review procedures by the graduate committee

- At the end of each academic year, the graduate committee reviews the standing of each graduate student.

Review procedures by the graduate committee

- At the end of each academic year, the graduate committee reviews the standing of each graduate student.
- A full progress evaluation for each student during the summer is carried out. This includes a report from the student's advisor (once the student has an advisor), and a full review of the student's file.

In the event of lack of progress

- If it is judged that a student is no longer in good standing, the student will be placed on probation for the next semester.

In the event of lack of progress

- If it is judged that a student is no longer in good standing, the student will be placed on probation for the next semester.
- In practice, there is no penalty associated with probation (no loss of funding) — the **first** time.

In the event of lack of progress

- If it is judged that a student is no longer in good standing, the student will be placed on probation for the next semester.
- In practice, there is no penalty associated with probation (no loss of funding) — the **first** time.
- At the end of the probation semester, if the student is still not in good standing, **then** the department will no longer support the student.

Example Case

- For a student who begins the program Fall 2022, the last chance to complete the qualifying exam requirement is August 2024.

Example Case

- For a student who begins the program Fall 2022, the last chance to complete the qualifying exam requirement is August 2024.
- Failing to do so will trigger a probation status in Fall 2024.

Example Case

- For a student who begins the program Fall 2022, the last chance to complete the qualifying exam requirement is August 2024.
- Failing to do so will trigger a probation status in Fall 2024.
- If the two quals are not passed by January 2025, all department support will be dropped.
